FLANGE MEASUREMENT

For manufacturers in the wind power industry
A PRECISION CHOICE
is also a safe choice!

LONG EXPERIENCE
Easy-Laser® measurement systems have been developed from more than twenty five years experience of solving measurement problems for the industry. This is long enough to understand problems out in the real world. At the same time, we are young enough to see opportunities and solutions with fresh eyes. Taking full control from the initial idea to the finished product and working closely with our users, we are able to create user-friendly measurement systems.

USERS ALL OVER THE WORLD
Easy-Laser® measurement systems are available from local dealers in more than 70 countries, but there are users to be found in many more countries. Easy-Laser® products are used within the wind power generation industry on a daily basis, by companies such as Vestas, Suzlon, Gamesa, and DeWind among others. For them, professional tools and the best possible support are of great importance, and the same is no doubt true for you as well. Service and repair centres can be found all over the world for your convenience. You can be assured that we will provide you with the fastest and best possible support.

LARGE SAVINGS
Easy-Laser® measurement systems are already extremely flexible in their standard form. By using clever accessories, you can adapt the systems for your own needs, now and in the future as your measurement requirements change. It is cost-effective. Your production capacity increases by being able to measure faster and with greater reliability. Easy-Laser® helps you remedy production errors quickly and easily. This can save you large amounts of money, and your investment can even be repaid within a few months.

ERGONOMIC DESIGN
In order for you, as a user, to be able to focus on the job in hand, it is important that the tools are ergonomic. The display unit has large well-spaced buttons that give clear feedback when pushed. Two Enter buttons make the system suitable for both right and left-handed users. The display screen has clear graphics that guide you through the measurement process.

ANALYSING THE RESULT ON SITE
Easy-Laser® Flange system makes your daily work more efficient. You can see the result as a 3D image in the display unit immediately after measuring. You can evaluate the result with different calculation settings, for example “three point reference”, “best fit” or “all positive”. This can also be done directly on site without having to stop to go to a PC with separate analysis programs, which was the case previously. This makes production much more efficient.

LONG TERM/RELIABLE
Our philosophy is that the products we develop must not only have long operating times but also a long lifecycle. We design our products to be robust, with as few small parts as possible. Measurement systems from Easy-Laser® can withstand rough handling and work without fault in the most demanding environments. Easy-Laser® is the safest choice in all situations.

OUR BEST ARGUMENTS
- Easy to learn and to use
- 3 year warranty provides assurance
- Fast service and support
- Ergonomic design
- Low overall costs during the entire lifecycle of the product, for example servicing, accessories, etc.
- Endurio™ Power management system ensures that you never have to stop in the middle of a measurement because the battery has run out
- True 3D: you can evaluate the result of the measurement directly in the 3D-image
EASY TO USE = FAST AND EFFICIENT

Measurement and alignment should be easy! That is the fundamental philosophy behind our measurement systems. When we talk about simplicity we mean several things, for example, simple to position or install the measurement equipment on the measurement object, easy to perform the measurement and easy to interpret the measurement result. Simple to use = quick and easy! Easy-Laser® Flange system is extremely easy to use and has many time-saving functions that enable you to measure even more flanges during a working day.

Easy-Laser® D23 laser transmitter is positioned directly on the flange. It has a motorised rotating head that creates a continuous laser plane over the entire measurement object, without hidden sectors.

The Easy-Laser® detector is positioned on the measurement point. As the laser beam constantly rotates, you only have to move the detector to each measurement point and register the measurement value. No time wasted repositioning the laser beam.

Once all measurement points have been registered, you can evaluate the results directly in the display unit. This can also be done directly on site without having to stop to go to a PC with separate analysis programs, which was the case previously. This makes production much more efficient.
FLATNESS OF FLANGES

FOR ALL TYPES OF FLANGE
Easy-Laser® Flange systems can be used on all sizes of flanges, regardless of diameter. You can measure 1 to 5 circles of measurement points, for example inner, middle and outer circles, in order to see the taper of the flange. Each circle can have 3–180 measurement points. The program guides you graphically step-by-step through the entire measurement, which quickens the measurement process.

EVALUATE DIRECTLY ON SITE
When the measurement of the flange is complete, the digits must then be interpreted. Easy-Laser® Flange systems make this extremely easy to do. And you can even do it on site, without having to go to a PC with separate analysis programs. This of course saves a lot of time. Time that you can use to measure more flanges. You can evaluate the result with different calculation settings, for example “three point reference”, “best fit” or “all positive”. The result is shown via graphics in true 3D.
PARALLELISM OF TOWER FLANGES

Easy-Laser® enables you to measure and check the parallelism of the flanges. This can be done in several ways, as shown to the right with system E910 for example. In addition to the standard equipment, two tripods and an angular prism are required.

The laser transmitter (D22) is placed on a tripod beside one of the flanges. An angular prism (D46) is placed on a tripod beside the other flange. The detector is then placed on the given measurement points on both flanges.

The program guides you step-by-step. The result clearly shows any parallelism errors between both flanges.
FLATNESS OF HUB FLANGES
The flanges on hubs can be checked in the same way as the tower flanges. No need for extra equipment in addition to what is included in an Easy-Laser® E910/E915 Flange system.

FLATNESS OF WING FLANGES
To check wing flanges we offer special accessory fixtures. Depending on the construction of the flanges, if they are non-magnetic for example, the fixtures have different designs. Ask us about special solutions for your own designs.

FLATNESS OF FOUNDATIONS
A basic requirement for the machines to work under the right conditions is that the bases they stand on are flat. Easy-Laser® enables you to check this too. No need for extra equipment in addition to what is included in an Easy-Laser® E910/E915 Flange system.
DOCUMENTATION
Create documentation according to your own needs

CREATE A PDF REPORT DIRECTLY
It is possible to generate a PDF report containing graphs and measurement data directly in the measurement system’s display unit. All the information about the measurement object is documented, and you can add your company’s logo and address details if you so wish.

EASYLINK™
The measurement system includes EASYLink™ data base program for Windows® as standard. Here you can collate all your measurements in the same place and also make more advanced calculations, add images, export to Excel® documents etc.

SAVE TO USB MEMORY
You can easily save desired measurements on your USB memory. This enables you to take it to your computer to print reports whilst leaving the measurement system in place to continue measuring.

SAVING IN THE BUILT-IN MEMORY
You can, of course, save all measurements in the display unit’s internal memory. You can then open an old measurement and re-measure those points you adjusted, or start from a new measurement avoiding having to enter certain necessary dimensions such as diameter, number of measuring points etc.

CONNECT TO YOUR COMPUTER
The display unit is connected to the computer via the USB port. It then appears on the desktop as a “Mass Storage Device” which you can easily transfer files to and from.

BARCODE READER
The barcode reader is used to enter the measurement object data automatically before measurement, which can save you time, and minimizes errors.
DISPLAY UNIT
The display unit for the E series enables you to work more efficiently and for longer than ever before thanks to several innovative solutions. It is also ergonomically designed with easy-to-grip rubber cladding and robust construction.

NEVER LOSE POWER!
The Easy-Laser® E900 series is equipped with our Endurio™ Power management system. This ensures that you never have to stop in the middle of a measurement because the battery has run out. If the internal battery’s charge level starts to drop, simply insert the batteries into the integrated battery compartment and continue measuring.

PERSONAL SETTINGS
You can create a user profile where you can save your personal settings. You can also have different settings for different types of measurements.

LANGUAGE SELECTION
Initially English, German, French, Spanish, Portuguese, Swedish, Finnish, Russian, Dutch, Korean and Chinese are available. More languages to follow.

ERGONOMIC
The display unit has a thin, easy-to-grip and rubber coated profile that ensures a secure grip. It has large well-spaced buttons that give clear feedback when pushed. In addition, the two Enter buttons make the system suitable for both right and left-handed users. The display screen has clear graphics that guide you through the measurement process.

VALUES PROGRAM
All our measurement systems come with the extremely useful Values program. With this, you can, in principle, measure any type of geometry, for example straightness and squareness. Many Easy-Laser® users therefore end up using the measurement system in many more places in their operation, than they first intended!

BUILT-IN HELP FUNCTIONS
We have integrated a calculator and conversion tool for length units in the display unit.

UPGRADING
If you wish to expand functionality in the future, the software in the display unit can be upgraded via the internet or by connecting a USB memory containing the new software.
DETECTOR E5 AND E7
Detector E5 is included in system E915. It can work with stationary and rotating lasers (see below) thanks to our Dual Detection Technology™. Detector E7 is included in system E910. Both detectors connect to the display unit via cable or wirelessly. The magnet base has a rotating head to align the detector to the laser transmitter.

LASER TRANSMITTER D22
Laser transmitter D22 can be used to measure flatness, straightness, squareness and parallelism. The laser beam can sweep 360° with a measurement distance of up to 40 metres [130’] in radius. The laser beam can be angled 90° to the sweep, within 0.01mm/m [0.5 mils/INCH]. This transmitter is included in system E910.

LASER TRANSMITTER D23 SPIN
Laser transmitter D23 has a motor driven, rotating head that gives a 360° laser plane. Measurement distance up to 20 metres [65’] in radius. This transmitter is included in system E915.

POWERFUL ATTACHMENT MAGNETS
Both D22 and D23 laser transmitters are installed against the flange using three super magnets. Hold the transmitter securely, even vertically.

SAFETY STRAP
The safety strap provides good protection against unexpected events, if someone knocks the laser transmitter for example. Easy to attach, through a bolt hole for example.

WIRELESS COMMUNICATION
The unit for wireless communication is easily inserted into one of the connectors on the detector. Wireless connection to the display unit enables you to work more freely.

A. Well protected connectors
B. Rotatable head
C. Magnet base
D. PSD (2 axis)

A. Rotatable head with angular prism
B. Tilting table

A. Rotating head (motor driven)
B. Tilting table

A. Super magnets
B. Safety strap

A. 2
Option 1: the laser beam is used for a 360° sweep.
Option 2: the laser beam is angled at 90° to the sweep.

The laser beam is used for a 360° sweep. Because the laser beam sweeps across the surface you do not need to align the beam for every detector position. Convenient!
**EXPANDABILITY**

**ANGULAR PRISM**
Angular prism D46 is used for parallelism measurement of the flanges. It deflects the laser beam 90°.

A. Angular prism, rotates 360°  
B. Sliding sled

A. With the rotatable angular prism you can reach the detector anywhere on the flange.  
B. It is quick and easy to align the beam with the detector using the sled.

**TRIPOD**
Tripod for use with angular prism D46 and laser transmitter D22/D23.

The height of the tripod can be adjusted between 500 and 2730 mm.

**WING FLANGE FIXTURES**
To check the wing flange flatness, we have various different fixtures. The biggest difference depends on whether the flange is magnetic or not. Contact us for further information.
**TECHNICAL DATA**

### System
- **Relative humidity**: 10–95%
- **Weight (complete system)**: 12.1 kg [26.7 lbs]
- **Carrying case**: WxHxD: 550x450x210 mm [21.6x17.7x8.3”]

### Laser transmitter D22 (system E910)
- **Type of laser**: Diode laser
- **Laser wavelength**: 635–670 nm, visible red light
- **Laser Safety Class**: Class 2
- **Output**: < 1 mW
- **Beam diameter**: 6 mm [1/4"] at aperture
- **Laser transmitter**: D22 (system E910)
- **Type of battery**: 1 x R14 (C)
- **Operating time/battery**: approx. 24 hours
- **Levelling range**: ± 30 mm/m [± 1.7”]
- **Squareness between laser beams**: 0.02 mm/m
- **Flatness of sweep**: 0.02 mm
- **Dimensions**: WxHxD: 139x169x139 mm [5.47x6.64x5.47”]
- **Weight**: 2650 g [5.8 lbs]

### Laser transmitter D23 (system E915)
- **Type of laser**: Diode laser
- **Laser wavelength**: 635–670 nm, visible red light
- **Laser Safety Class**: Class 2
- **Output**: < 1 mW
- **Beam diameter**: 6 mm [1/4"] at aperture
- **Laser transmitter**: D23 (system E915)
- **Type of battery**: 2 x R14 (C)
- **Operating time/battery**: approx. 15 hours
- **Levelling range**: ± 30 mm/m [± 1.7”]
- **Squareness between laser beams**: 0.02 mm/m
- **Flatness of sweep**: 0.02 mm
- **Dimensions**: WxHxD: 139x169x139 mm [5.47x6.64x5.47”]
- **Weight**: 2650 g [5.8 lbs]

### Detector E7 (system E910) and E5 (system E915)
- **Type of detector**: 2 axis PSD 20x20 mm [0.78” sq]
- **Wireless Detection Technology™**: Can detect both spinning and stationary laser beam
- **Resolution**: 0.001 mm [0.006 mils]
- **Measurement error**: ± 1% + 1 digit
- **Thermal sensors**: ± 1° C accuracy
- **Inclinometers**: 0.1° resolution
- **Environmental protection**: IP Class 66 and 67
- **Operating temperature**: -10–50 °C
- **Housing material**: Aluminium
- **Dimensions**: WxHxD: 139x169x139 mm [5.47x6.64x5.47”]
- **Weight**: 2650 g [5.8 lbs]

### Display unit
- **Measuring programs**: Flange flatness / Flange parallelism / Values
- **Type of display/size**: VGA 5.7” colour
- **Data resolution**: 0.001 mm / 0.006 thou
- **Power management**: Endurio™ system for unbroken power supply
- **Battery compartment**: Li Po
- **Housing material**: Anodized aluminium
- **Dimensions**: WxHxD: 60x60x42 mm [2.36x2.36x1.65”]
- **Weight**: 186 g [6.6 oz]

### Wireless connection unit
- **Wireless communication**: Class I Bluetooth® Wireless Technology
- **Operating temperature**: -10–50 °C
- **Environmental protection**: IP Class 66 and 67
- **Housing material**: ABS
- **Dimensions**: WxHxD: 53x32x24 mm [2.1x1.2x0.9”]
- **Weight**: 25 g [0.9 oz]

### Cables
- **Type**: With Push/Pull connectors
- **System cable**: Length 2 m [78.7”]
- **Extension system cable**: Length 5 m [196.8”]
- **USB cable**: Length 1.8 m [70.8”]

### Magnet base with turnable head (for detector)
- **Holding power**: 800 N

### Rods for detector
- **Length**: 60 mm / 120 mm (extendable) [2.36”/4.72”]

### EasyLink™ data base software for PC
- **System requirements**: Windows® XP, Vista, 7. For the export functions, Excel 2003 or newer must be installed on the PC.

### A complete system contains
1. Laser transmitter D22 (only system E910)
2. Laser transmitter D23 (only system E915)
3. Detector E7 (only system E910)
4. Detector E5 (only system E915)
5. Display unit
6. Bluetooth unit
7. Cable 2 m
8. Cable 5 m (extension)
9. Cable support
10. Safety strap for laser transmitter
11. Targets for rough alignment
12. Set of rods (6x60 mm, 6x120 mm)
14. Quick manual
15. Measuring tape 5 m
16. USB memory stick (with EasyLink™ program)
17. USB cable
18. Battery charger (100–240 V AC)
20. Toolbox
21. Cleaning cloth for optics
22. CD with documentation
23. Carrying case

**System Easy-Laser® E910 Flange, Part No. 12-0525**

**System Easy-Laser® E915 Flange, Part No. 12-0526**
LONG WARRANTY PERIOD
The Easy-Laser® systems are developed with the backing of more than 25 years’ experience of solving measurement and alignment problems for the industry, all over the world. The systems come with a generous three year warranty*. The manufacturing and quality systems are approved according to ISO9001.

QUICK SERVICE
Our service department usually takes care of servicing or calibration within five working days. All this makes Easy-Laser® a safer working partner for your operation. As an extra service, we provide a 48 hour express service for when accidents occur and time is of the essence. Contact us for further information about terms and conditions.

* Extend the warranty from 2 to 3 years by registering your system on the Internet.

IN-HOUSE EXPERTISE
We take care of the entire chain internally, from idea to the end product. Our development department consists of designers who specialise in mechanics, electronics, optics and programming.

CLEVER DESIGN
Our development department continuously strives to simplify the user’s work through innovative and clever solutions. It is the collaboration between laser transmitter, detector and software that is the key to a quick and easy measurement. This is where Easy-Laser® shines.

CUSTOM DESIGN
In addition to our already versatile standard system we can also specially adapt measurement systems to suit your needs, something we are proud of being able to offer. Using our own CNC machines we can quickly manufacture fixtures just for you.
